

# Auto-Operator

This system shines in the field as an essential component where timing and space-saving are critical. It is fully customizable and comes standard with an LED S.M.A.R.T. Panel with instant visual feedback and operational mode selection with a single button press. The ability to be hands free is also a staple in a setting where the prevention of germ spreading is paramount. Modtrax continues to strive for fully customizable systems tailored toward customer needs.

An Auto-Operator can be utilized in projects that require UL-1784 and/or STC Rating.

ModTrax is unveiling its re-engineered auto-operator for their MedicalSlide & CommercialSlide Systems. In conjunction with Record-USA, Modtrax has developed a sleek design that conceals the track, electronics, and ball-bearing rollers/hardware under its new one-piece valance.

## S.M.A.R.T. Panel

- \*Panel can be manually locked
- \*Highly sophisticated programming
- \*Displays current settings
- \*Notifies user of required replacements

# Medical/CommercialSlide-<sup>TM</sup> Compatible
